FR1

The Waterproof Tyer. Cutting-edge technology.

The FR1 is the most advanced rotary tying machine in the agri-food industry. It is equipped with a fully sealed knotter that allows for perfect machine hygiene as well as protection of all moving parts, reducing maintenance costs. Its large SIEMENS touch screen offers numerous functions such as tying in 1, 2, or 3 loops, cross tying, tying speed, production data, maintenance operation tutorials, etc.

Ideal for tying meats, roasts, pork loin or breast, the FR1 allows for a serene tying operation, operator comfort, and compliance with sanitary standards.
